

securlyclassroom

Cheat Sheet

This cheat sheet gives you a basic overview of how to use Securly Classroom to run a class. For more in-depth information on any feature, see our User Guide at docs.securly.com/docs/classroom

To access Securly Classroom, go to deviceconsole.securly.com/classroom. Once logged in, you will see a screen that looks like this:

A Help

- **Join the discussion:** Connect with other Classroom users in the Lounge!
- **Classroom User Guide:** The answer to all your Classroom questions.

B Currently active and past classes

- Active class sessions and history
- View currently running classes and class history from these tabs.

C Search and filter

- Search for classes, or filter by what type of class (where the class is rostered from, i.e. Schoology, Canvas, etc.) or what school (location) the class is associated with.

D Start a class

- Edit and start classes from the Classes menu.
- Click the class title on a card to edit class details, or click the arrow button to start the class.

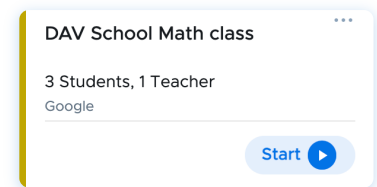

E Web links

- Here you can set up what web links (websites) you want to use (or block) during a class. You can add web links, create collections of web links, and also create and manage your block lists.

Starting a Class

- 1 Locate the class you want to start, then click on the  button.
- 2 Confirm your **Class session settings** in the left-hand sidebar.
- 3 Remove any students who are absent in the **Student selection** panel, then click **Start now**.

Use the three-dot menu on the top right of the class card to pin the class, view class history and update class settings.

Running a Class

Screen Lock

Freeze screens and get your class's attention by sending a custom message (e.g. All eyes up front, please) then release individual students or the entire class at once.

Site Lock

Open and lock students to a particular website or set of websites, blocking others.

Push URL

Quickly push web pages to individual students or your entire class.

Share Screen

Share your desktop, a single tab, or an application with one student or your whole class, as well as audio remote students.

Announce

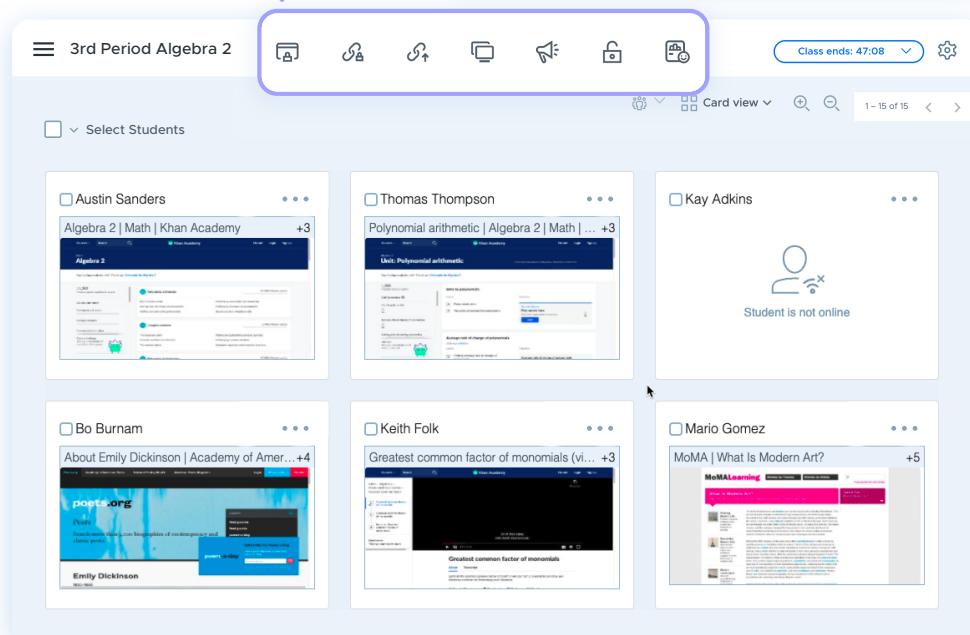

Send a message to all student avatars that they must acknowledge to close (e.g. Reminder: Big test tomorrow!).

Unlock

Release individual students or the whole class from Screen Lock or Site Lock.

Get in Rhythm

Offer daily emoji based student wellness check-ins.

Groups

Click on the groups icon to create and display student groups.

Change View

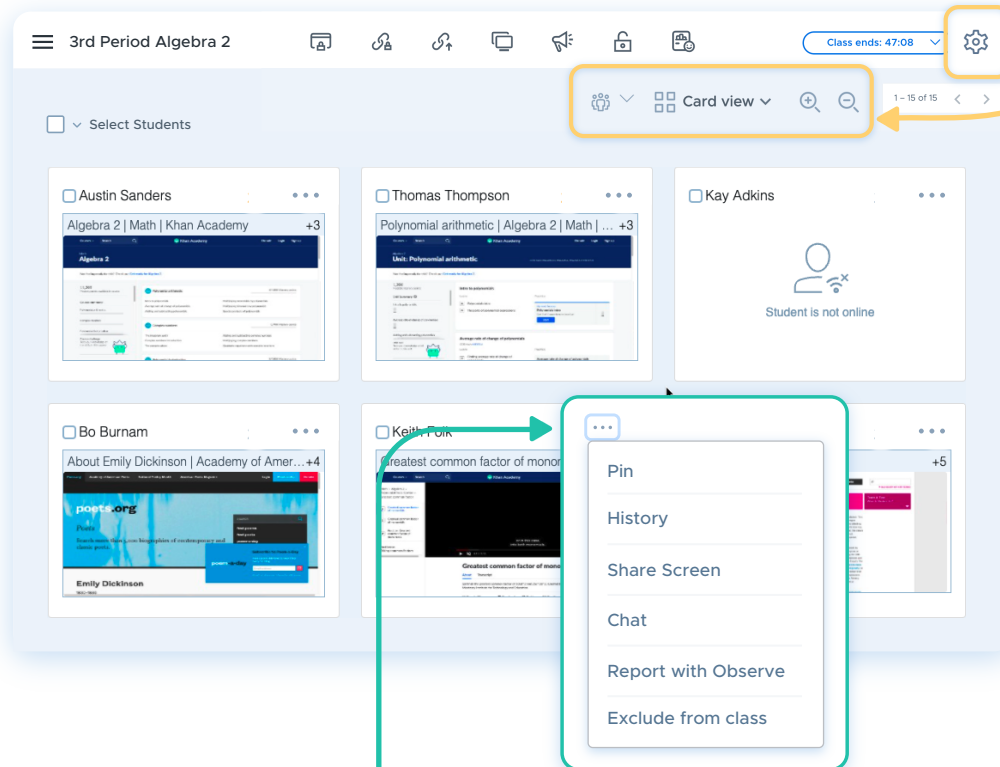

You can now adjust how you view students screen and choose from Card View, Tab View and Rhythm View.

Zoom In/Out

See more students at once, or more detail.

Session Options

Add blocklist and adjust student communication settings in an active class session.

Pin

Hone in on individual students if you want to keep a closer watch.

History

Quickly see a student's browsing history for that class session.

Chat

Communicate one-on-one with students and maintain logs of all chats.

Resetting Student Passwords

- To reset a student's Google account password, go to the **Users** menu, then the **Rostered Students** tab. Click the student, then under the Student Details section, select **Reset student Google password**.
- The dialog box that appears will let you set a new password for the student. You can also require the student to change their password when they sign back in.
